

Name: _____

Date: _____

Learning Goal 6.1

I can solve equations.

Example Solve the following equations.

$$-112 = 9 - 11f$$

$$-15 - 8g = 17$$

$$5h - (-80) = 170$$

$$125 = -22 + (-7j)$$

$$-9k - (-36) = -153$$

$$-112 - \frac{m}{2} = -496$$

$$-\frac{3x}{2} + (-63) = -282$$

$$3 - \frac{5v}{9} = -2$$
