

Name: _____

Date: _____

Learning Goal 6.1

I can solve equations.

Example Solve the following equations.

$0.1m + 23.2 = 25.5$

$1.1n - 17.7 = 31.2$

$42.1 = 18.9 - 4.2p$

$76.5 = -5.3 + (-2.2q)$

$\frac{4}{3}r = 16$

$\frac{2}{3}s - 9 = 11$

$\frac{2s - 9}{3} = 11$

$-13 = 13 - \frac{t}{3}$
