

Day 1

Day 2

Wings  $(1+1+1+1)+(1+1+1+1)+(1+1+1+1)+(1+1+1+1) = +20$

Antenna  $-1-1-1-1-1-1 = -6$

Bee Body  $x+x-x-x-x+x^2 = x^2-x$

Legs  $-1-1-1-1-1-1-1-1 = -8$

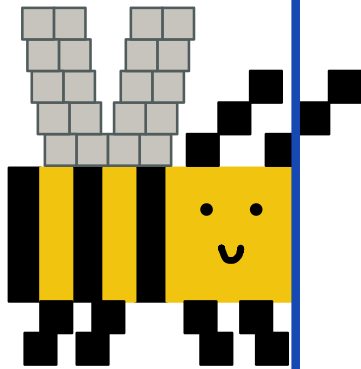

Flower  $-x^2-x^2-x^2-x^2 = -4x^2$

$$20 - 6 + x^2 - x - 8 - 4x^2$$

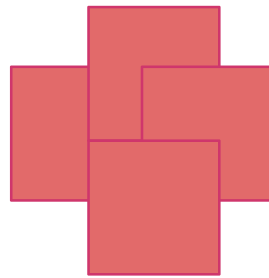

$$= -3x^2 - x + 6$$

Day  
3

A

B

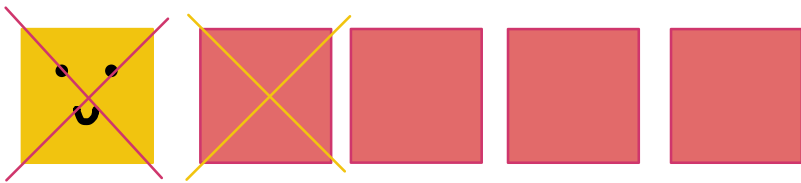

wings: + 20  
 antenna: - 4  
 body:  $x^2 - x$   
 legs: - 8  
 $x^2 - x + 8$

$$-4x^2 - 2$$

Algebraically

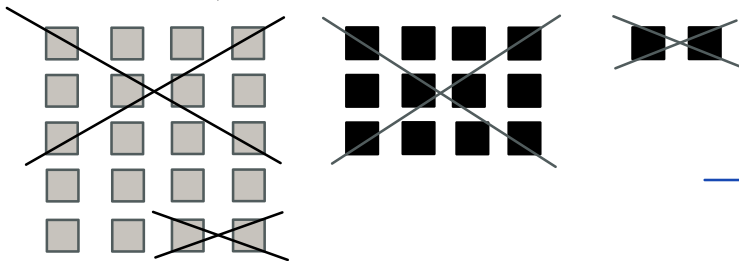

$$\begin{aligned} A + B &= (x^2 - x + 8) + (-4x^2 - 2) \\ &= x^2 - x + 8 - 4x^2 - 2 \\ &= -3x^2 - x + 6 \end{aligned}$$

$$-3x^2$$

$$-x$$

$$+ 6$$

---

$$-3x^2 - x + 6$$
