Name: _____   Date: _____

Learning Goal 2.2	I can apply exponent laws to expressions.

Recall from yesterday:

$a =$	$b =$	$c =$
Base	Bigger Exponent	Smaller Exponent

Multiplying powers of the same base.

Dividing powers of the same base.

When the power of a base is another power.

Dividing when the exponent in the numerator is smaller than the exponent in the denominator.

Dividing two powers of the same base and exponent.
