**Learning Goal 4.2**

Solving first- and second-degree equations over restricted domains and all real numbers.

**More Questions – Solutions**

1. Solve the following trigonometric equation on the specified domain for exact value(s) of  $\theta$ , where possible. Otherwise round your answers to the nearest hundredth.

a.  $7 \cos \theta + 5 = 2 - 3 \cos \theta, 0^\circ \leq \theta < 360^\circ$

$$7 \cos \theta + 5 = 2 - 3 \cos \theta$$

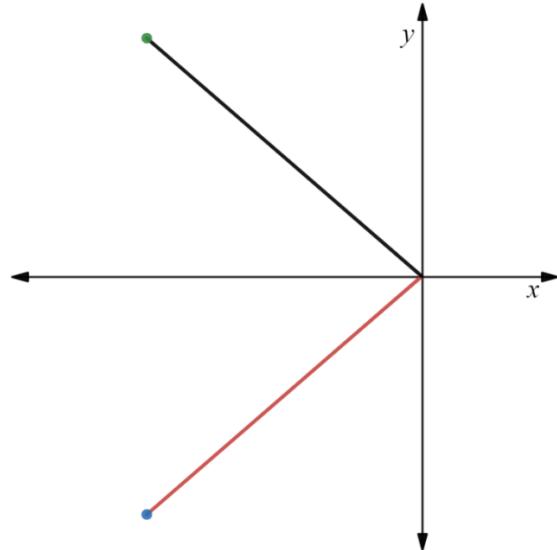

$$10 \cos \theta + 5 = 2$$

$$10 \cos \theta = -3$$

$$\cos \theta = -\frac{3}{10}$$

$$\theta = \cos^{-1} \left( -\frac{3}{10} \right)$$

$$\theta_1 = 107^\circ$$

$$\theta_R = 180^\circ - 107^\circ \quad \theta_2 = 180^\circ + 73^\circ$$

$$\theta_R = 73^\circ \quad \theta_R = 253^\circ$$

b.  $17 + 3 \cot \theta = 29, -2\pi \leq \theta \leq 2\pi$

$$17 + 3 \cot \theta = 29$$

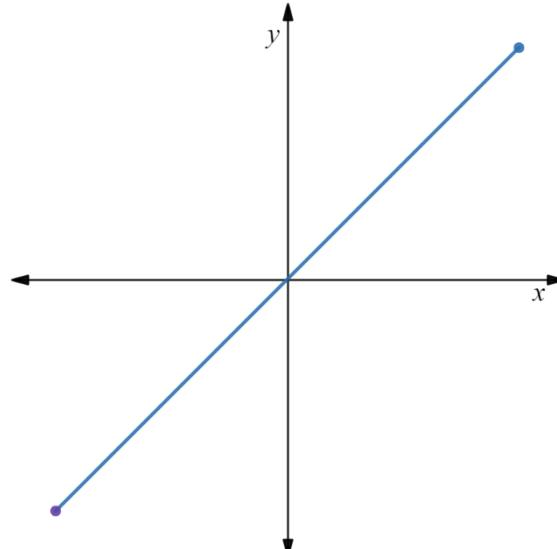

$$3 \cot \theta = 12$$

$$\cot \theta = 4$$

$$\tan \theta = \frac{1}{4}$$

$$\theta = \tan^{-1} \left( \frac{1}{4} \right)$$

$$\theta_1 \approx 0.24$$

$$\theta_R \approx 0.24$$

$$\theta_2 \approx \pi + 0.24$$

$$\theta_2 = 3.39$$

c.  $4 \csc x - 5 = 3, -180^\circ \leq x < 360^\circ$

$$4 \csc x - 5 = 3$$

$$4 \csc x = 8$$

$$\csc x = 2$$

$$\sin x = \frac{1}{2}$$

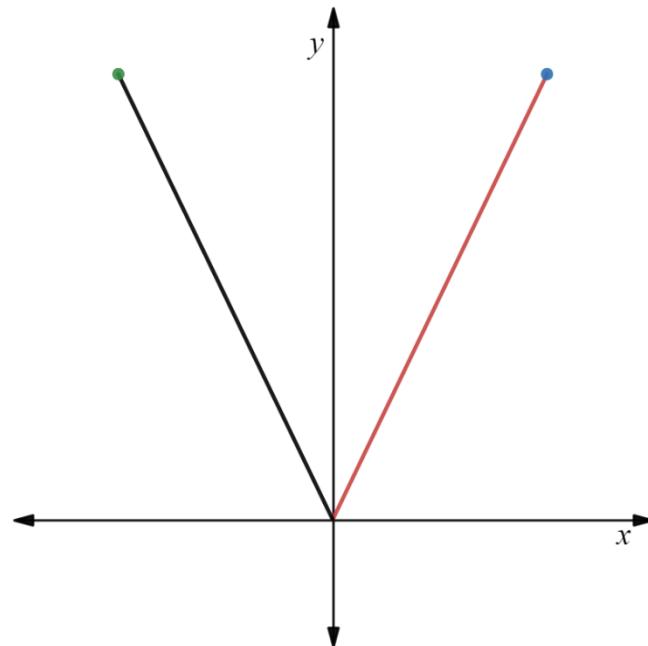

$$x = \sin^{-1}\left(\frac{1}{2}\right)$$

$$x_1 = 30^\circ$$

$$x_R = 30^\circ$$

$$x_2 = 180^\circ - 30^\circ$$

$$x_2 = 150^\circ$$

d.  $7 \cot \theta - 4 = 6 \cot \theta - 5, 0 \leq \theta < 4\pi$

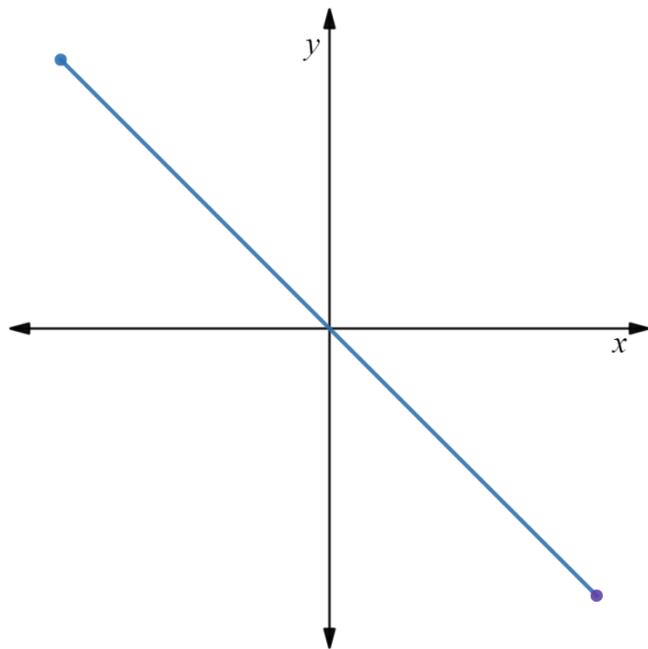

$$7 \cot \theta - 4 = 6 \cot \theta - 5$$

$$7 \cot \theta = 6 \cot \theta - 1$$

$$\cot \theta = -1$$

$$\tan \theta = -1$$

$$\theta_1 = \frac{3\pi}{4}$$

$$\theta_R = \frac{\pi}{4}$$

$$\theta_3 = 3\pi - \frac{\pi}{4} = \frac{11\pi}{4}$$

$$\theta_4 = 4\pi - \frac{\pi}{4} = \frac{15\pi}{4}$$
