

Name: _____

Date: _____

Learning Goal 1.3

I can apply order of operations to integers.

Upon completion of the Four 4s assignment, you need to submit your work to Teams. There are very specific guidelines for doing this, and **I will be returning your work unmarked if they are not followed!**

1. Take photos of both sides of your assignment sheet, as well as any scrap paper you may have used to find your answers.
2. Insert your photos into a Microsoft Word document (you should all have access to this through your Office 365 account – if not come see me!) in the following order:
 - a. The front page of the assignment sheet.
 - b. The back side of the assignment sheet.
 - c. Any more work you think shows your thinking well.

Make the pictures take up as much space as they can on a page (enlarge them to take up as much space as they can).

3. Print your file to a PDF with the following naming convention

Your Name – Four 4s Assignment

4. Submit the PDF to Teams!
